PROFILE

Problem-solving Software Engineer and competitive programmer with strong foundational knowledge in data structures, system architecture, and API development. Experienced in designing multi-agent frameworks, configuring network protocols, and prototyping scalable B2B applications. 3rd-year B.Tech IT student.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript

System Architecture: Multi-Agent Systems, B2B Platforms, Network Protocols (SMB), System Governance

Backend: Node.js, REST APIs, SQL

Tools: Git, GitHub, Linux Environments, AWS

KEY PROJECTS

Fair Hiring Network (Backend Architecture)

Jan 2026 – Apr 2026

- Architected the backend framework for a multi-agent AI verification system targeting the B2B Indian recruitment market.
- Designed robust internal APIs allowing independent agents to communicate, verify skills, and log unbiased evaluations.
- Integrated scraping tools to ingest and normalize technical performance data from external competitive programming platforms.
- **Technologies:** Python, API Design, System Architecture, Web Scraping

AEGIS System Governance Layer

Mar 2026

- Developed the core logic for an AI governance layer meant to act as a secure gateway for autonomous operations.
- Implemented policy enforcement algorithms to restrict out-of-bounds agent behavior in financial and IT contexts.
- **Technologies:** Python, Algorithmic Logic, Security Frameworks

NAS Network Configuration & SMB Deployment

Mar 2026

- Deployed a personal Network-Attached Storage (NAS) solution to centralize version control and media hosting.
- Configured Samba (SMB) services and network routing using an Airtel Xstream interface for high-availability access.
- **Technologies:** Networking, Bash/Linux, Samba (SMB)

EDUCATION

Bachelor of Technology in Information Technology 2023 - 2027 (Currently in 3rd Year)

ABES Institute of Technology, Ghaziabad, India

ACHIEVEMENTS & CERTIFICATIONS

- **Winner, Smart India Hackathon (SIH) 2025:** College-level winner for designing a scalable, impact-oriented AI solution.
- **Hackathons:** Participated in HackJNU and various hackathons, developing end-to-end projects demonstrating problem-solving skills and teamwork.
- **Competitive Programming:** Actively monitor and improve technical performance on platforms such as LeetCode and Codeforces.
